

# Game Design

(Not game building!)

# What is game design?

- Last week we did some game building, but this week we're going to work on game DESIGN. In the game industry, it takes a few steps to create a game! Look...

1. The idea! (for a game)

2. First you make the pieces! (of the game)

3. Then, you all use the pieces to design the thing! (The game)

Hmm...

Nah...

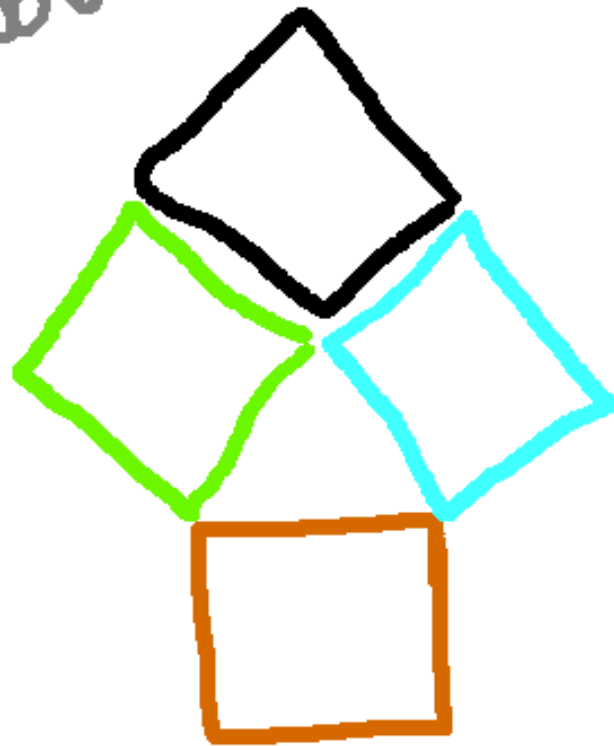

Closer...

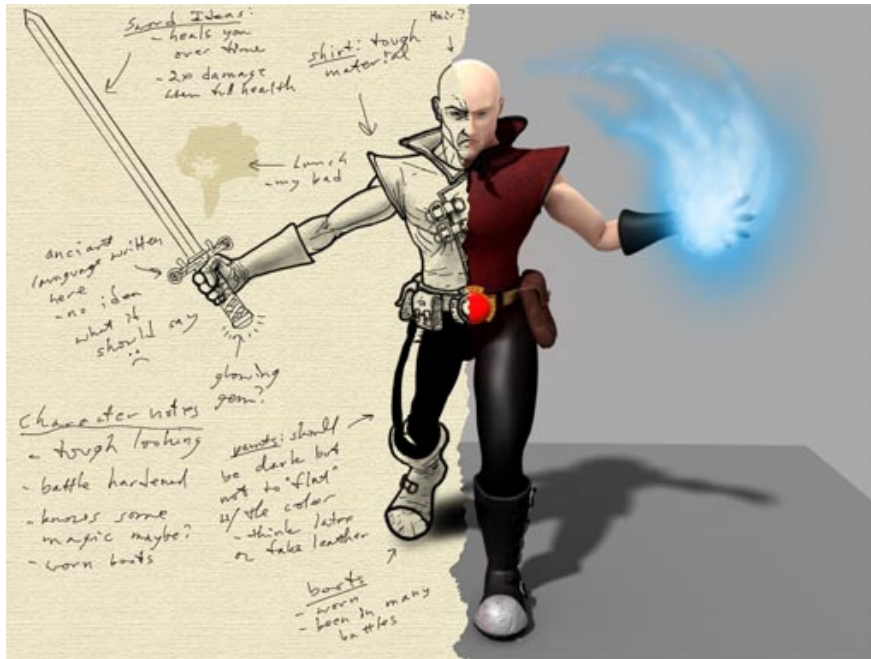

4. You design something  
you like! The game looks good!

wow! Amazing!

# So, today I have an idea and a bunch of pieces. YOU are the designer!

- Everyone will make a level, and then we'll put all the levels together into a game. We'll come up with a game name at the end!
- Designing games is fun! But you need to think a little. Put some easy challenges first. Then gradually make it more difficult, until the end!

Let's look at Super Simon World!
