

Building an obstacle course!

Your obstacle course should have:

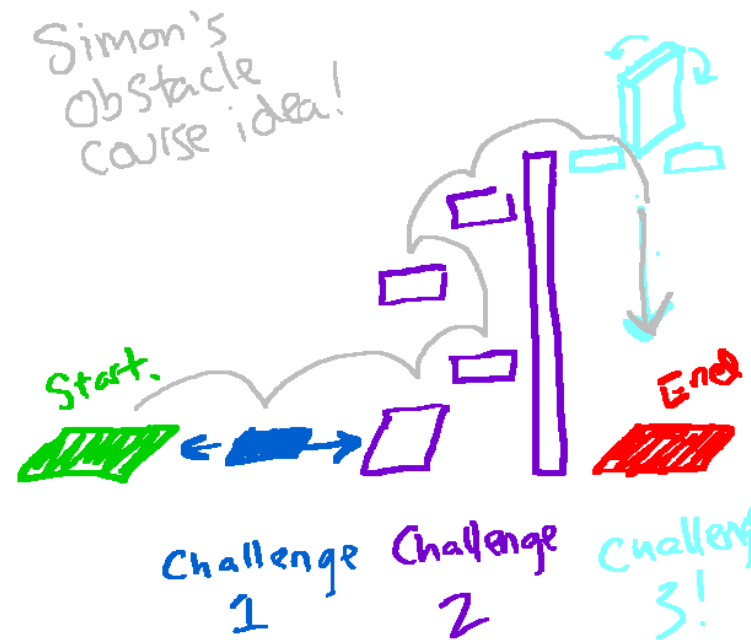

- Different Minecraft textures...
- 3 puzzles
- 3 sounds

– Let's try out my Obstacle course! Are there any challengers? Can you count the puzzles? the sounds?

Can you count the 3 different challenges in my obstacle course?

- Let's come up with three challenges. Maybe we could draw them!

I made you some new programming scripts!

1. A platform script that lets you stand on the platform while it moves around! Hooray!
2. A DEATH script! If you touch an object with this script, your character will go back to the beginning.
3. These scripts are in a package on your desktop. Double click the package when you're working on your obstacle course to use these things!

Ready to build? GO!

OK!

rdy 4 put in teh goldfishes!
